## Strengths

### Friendly communication

Excellent written and verbal communication skills, gained through experience in working with customers in prior employment. Confident, articulate and professional speaking abilities in English and Serbian. Empathic listener and persuasive speaker, creative in solving problems.

### Can-do approach

Outgoing and positive attitude towards the people working with me and around me. Able to understand and promote company policies and values. Always open and looking forward to learning new skills and passing them on if needed.

## Profile

I am a motivated and passionate frontend developer with more than 6 years of experience, always striving to improve and create the best possible experience for myself and those surrounding me.

Dedicated to writing highly maintainable and reliable code while following best practices.

## Work Experience

May 2019 - Present

### Frontend developer - Unimaze Software

▶ Develop new features and functionality for a React-based SaaS e-invoicing application.

▶ Write reusable, efficient, and scalable TypeScript code.

▶ Build modular and reusable components to enhance maintainability.

▶ Develop applications and websites from scratch using modern technologies.

▶ Migrate old libraries to newer, more efficient alternatives.

▶ Design and develop user-friendly XSLT stylesheets.

▶ Creating and maintaining adaptive cards.

▶ Collaborate with the team in Agile sprint planning and development processes.

▶ Assist with onboarding and mentoring new team members.

▶ Perform bug fixes, conduct thorough code reviews, and ensure code quality.
